Bufferbeam

Customer Information

This model has been designed to incorporate as many authentic detail variations as possible across the 512 Class 47s from 1962 onwards, including the following:

- 1) Original or Serck radiator shutters
- 2) No2 end roof panels for Spanner, Clayton Mk II and Stone Vapour steam heating boilers, both open and plated
- 3) Underframe tanks/battery boxes - see left
- 4) Bufferbeam details, including steam heating and two designs of ETH cable
- 5) Original, crash repair and 'life extended' cab ends with glazed or plated headcode panels and with or without HI headlights
- 6) Class 47/7 locos with RCH or TDM control cables for push-pull duties
- 7) Original or cutaway bufferbeam cowling
- 8) Single arm or pantograph type wipers
- 9) Round or rectangular buffers
- 10) NRN radio aerials
- 11) Headcode panel inserts with marker lights or opaque lenses
- 12) Custom designed body for Sulzer 'V' engined D1702-06, also known as Class 48
