

Parts Diagram - LMS Inspection Saloon O gauge

Roof is removable. Carefully lift off to release magnets.
 Interior lighting can be added using part #19853500 LED light strip (trim to correct length for this model)

Part #9a Vent Box is for early period LMS/BR models only

Vehicle History:
 From 1942 the LMS built 13 inspection saloons for district managers. Used to inspect lines, bridges and tunnels, the vehicles were also used for VIP trips, military escorts and meetings until the 2000s. Many survive in preservation as observation/dining saloons.

ETH/air brake parts are only fitted on later period models for 1970s onwards

Part no.	Part name	Note	Part no.	Part name	Note
5a	FRONT_WINDOW		54	ROOF_WIRE_LONG_R	
6a	LARGE_WINDOW		55	ROOF_WIRE_SHORT_R
